JavaScript

Web Design

C++

Phyton

SQL

PERSONAL PROJECTS

Disaster Management system

- Developed a Disaster Management System that maintains detailed records of past disasters and associated damages, enabling authorities and researchers to analyze historical data for better future preparedness and resource planning.

Documents verification system

- Designed and implemented a Document Verification System using blockchain technology, where each uploaded document is hashed and securely stored through MetaMask integration, ensuring tamper-proof and decentralized storage.

Nutri-Fit AI

- Developed Nutri-Fit AI, an intelligent health assistant that analyzes user input (age and weight) to determine fitness goals (weight gain or loss) and recommends personalized diet and exercise plans using AI-trained datasets.
- Utilized health and fitness datasets to train the AI model, ensuring tailored recommendations that adapt to individual user profiles and promote healthier lifestyle choices through smart automation.
